

MO WONG

FULL STACK DEVELOPER

Full stack developer with experience designing and building web applications with Javascript, Typescript, React, GraphQL, and RESTful APIs. Entrepreneurial spirit, with 5 years building and managing own business.

EXPERIENCE

Swift, Full Stack Developer

2020 - Present

- Swift is a real-time video conferencing app built with React, Typescript, SCSS, Express, GraphQL, PostgreSQL, Docker, and Heroku
- Worked in a small and agile development team to design, develop, and deploy app from the ground up
- Responsible for building, integrating, and managing multiple servers
- Designed database structure with strongly typed language to prevent run-time errors
- Collaborated extensively with the front-end team to manage and streamline client-server data flow
- Designed and styled key features of the front-end interface to improve user experience

Digital Marketing Consultant, Self-Employed

2015 - 2020

- Consulted with e-commerce businesses to strategize and implement growth opportunities with paid search, copywriting, and email marketing

Muscular Dystrophy Association, Care and Clinical Services Coordinator

2015

- Managed patient outreach for 700+ patients by organizing family support groups, educational and advocacy workshops, fundraisers, and large youth events

EDUCATION

Codeworks

Software Engineering | 2020

University of Southern California

Master of Health Administration | 2013 - 2015

PERSONAL PROJECTS

Pissed At Congress

2020

- A mobile app to help people find and contact members of the United States Congress
- Built with React Native, RESTful, Express, and PostgreSQL

NavBar Generator

2020

- An NPM open-source project to easily generate navigation bars for React UIs
- Built with React, Typescript, and Jest and React Testing Library unit testing
